

PROJECT INFORMATION FOR 2018 DEQUINDRE RD. WIDENING PROJECT

PROJECT DETAILS

The project involves the reconstruction and widening to five lanes of Dequindre Road from Long Lake Road to Burningbush Drive. The reconstructed road will include two through lanes in each direction as well as a continuous center left-turn lane and right-turn lanes at major intersections.

The project includes concrete curbs and gutters as well as new traffic signals and storm sewers. Pedestrian crosswalks will be upgraded to Americans with Disabilities Act (ADA) standards. The project is intended to provide increased traffic capacity, improved safety and greater accessibility for pedestrians and other non-motorized users.

SCHEDULE AND IMPACT ON TRAFFIC

The project began in September 2017. The majority of the road surface work will be completed between April and November 2018.

This section of Dequindre will remain open for the majority of the project. However, the Dequindre/Square

Lake intersection was completely closed for a short time. Additionally, there were short periods when Square Lake was closed at the west or east sides of the intersection in 2018. The closures have taken place and the road is open to traffic as of June 29, 2018.

FUNDING

The project is expected to cost approximately \$16.5 million. Eighty percent of the cost is being paid for with federal dollars. The remainder is being shared by Road Commission for Oakland County (RCOC), the Macomb County Department of Roads and the cities of Troy and Sterling Heights.

FOR MORE INFORMATION
