ORG: 11-19-24

**a. Description.**

This work consists of excavating, stripping topsoil, placing and compacting embankment, and grading for driveway and side street construction, sidewalks and/or other areas designated on plan. This work shall be done in accordance with Section 205 of the *2020 Michigan Department of Transportation Standard Specifications for Construction*, except as herein provided.

**b. Materials.**

All work shall be in accordance with the contract documents.

**c. Construction.**

Suitable excavated material from the project shall be used where needed to construct embankments or flatten side slopes on driveways, streets, sidewalks and/or in other earthwork areas designated on the plans, as directed and approved by the Engineer. Unsuitable or surplus excavated material that cannot be used on the project shall become the property of the Contractor and disposed of properly.

**d. Measurement and Payment.**

<b>Pay Item</b>	<b>Pay Unit</b>
Excavation, Earth, SAD.....	Cubic Yard

Payment for **Excavation, Earth, SAD** includes all equipment, labor and materials to complete this item as specified above.

The Engineer will measure **Excavation, Earth, SAD** in its original position. Excavated material will be measured and paid for once. Payment includes excavation and all work associated with the material after excavation for constructing embankment, other approved use, and disposal. Storage of excavated material to be used as embankment shall be the Contractor's responsibility. No extra compensation will be allowed for storage or hauling costs associated with embankment.

Payment for all embankment required for earthwork shall be included in the measured quantity for **Excavation, Earth, SAD** to the extent that embankment material approved by the Engineer is available on the project. Embankment constructed from off-site material will be paid for per the standard embankment pay item(s) only after approved on-site material has been exhausted on proposed embankments on the project.
