a. Description

This work shall be done in accordance with section 205 of the *Michigan Department of Transportation (MDOT) 2020 Standard Specifications for Construction*, except as herein provided.

This work consists of excavating, stripping topsoil, placing and compacting embankment, and grading for areas designated on the plans.

b. Materials

All work must be in accordance with the contract documents.

c. Construction

All suitable excavated material from this item shall be used, as directed by the Project Engineer, to construct embankments or flatten slopes on driveways and side streets, or in other earthwork areas designated on plan.

All surplus and unsuitable material must be disposed of properly in accordance with subsection 205.03.P of the *MDOT 2020 Standard Specifications for Construction*.

d. Measurement and Payment

The completed work, as described, will be measured and paid for at the contract unit price using the following pay item:

Pay Item	Pay Unit
Excavation, Earth, RCOC.....	Square Yard

Excavation, Earth, RCOC includes equipment, labor, and materials to complete this item as specified above. **Excavation, Earth, RCOC** is measured and paid for by square yard area, regardless of depth or irregularities in depth and includes placement of embankment to the extent embankment material, as approved by the Engineer, is available on the project.

Embankment in earthwork areas designated as **Excavation, Earth, RCOC** constructed from off- site material will be paid for per the standard pay item for Embankment only after approved on-site material has been exhausted on proposed embankments on the project. Storage of excavated material to be used for embankment shall be the Contractor's responsibility. No extra compensation will be allowed for storage or hauling costs associated with embankment. The removal of existing HMA or concrete pavements and associated curb and/or gutter shall be performed, measured and paid for separately as provided in the contract documents.
